HM Portal — Admin & Staff Manual

Hospitality Management event management system. This manual covers everything a staff account can do: creating and managing events, moving them through their lifecycle, reading reports, and managing user accounts.

Screenshots were taken from the live portal at https://hmportal.vercel.app.

---

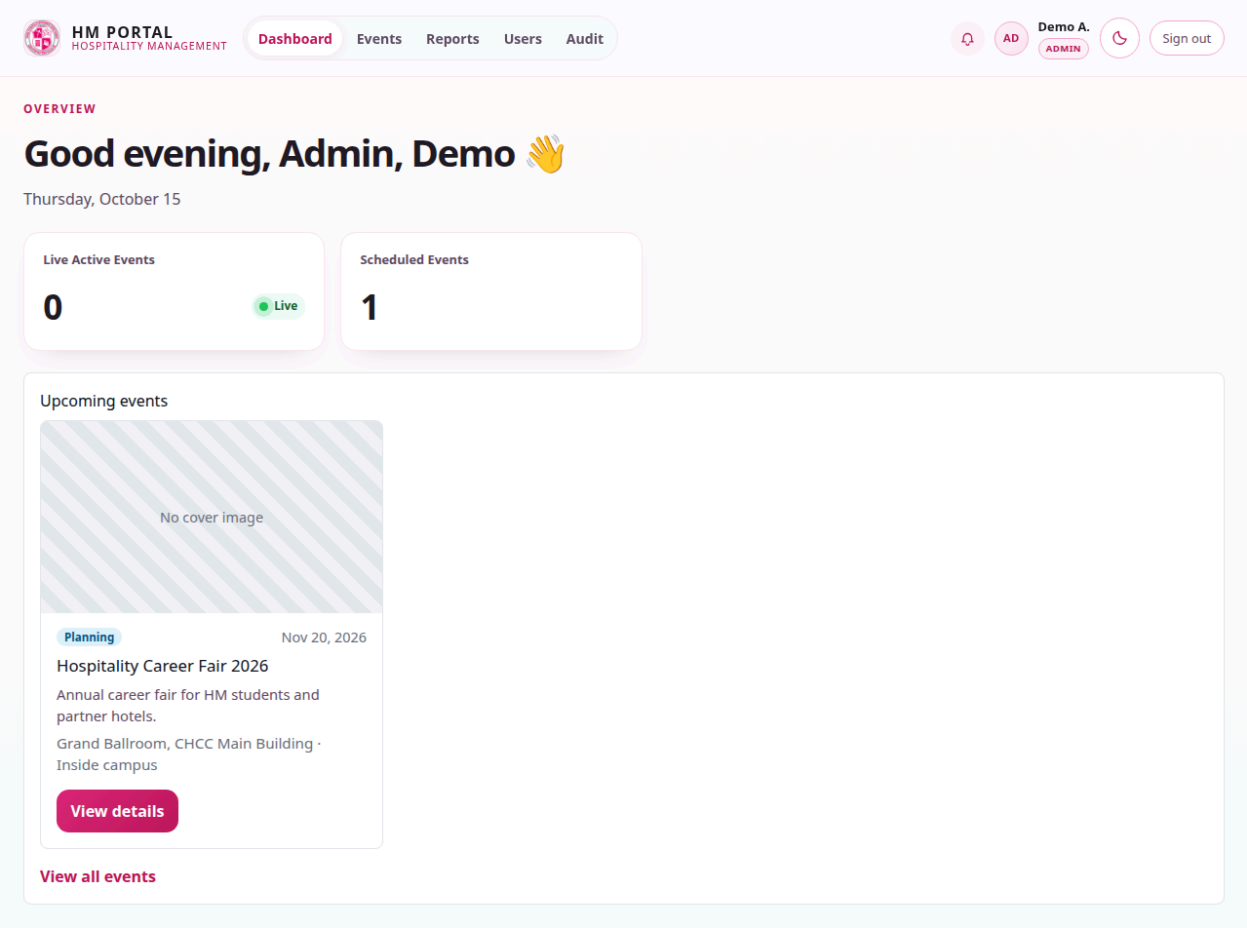

1. Signing in

Open the portal and choose **Sign in**. Enter your campus email and password.

Use the password your administrator gave you. If it is a temporary password you will be taken straight to a password screen (see §7).

CONFIDENTIAL

2. The dashboard

The staff dashboard shows:

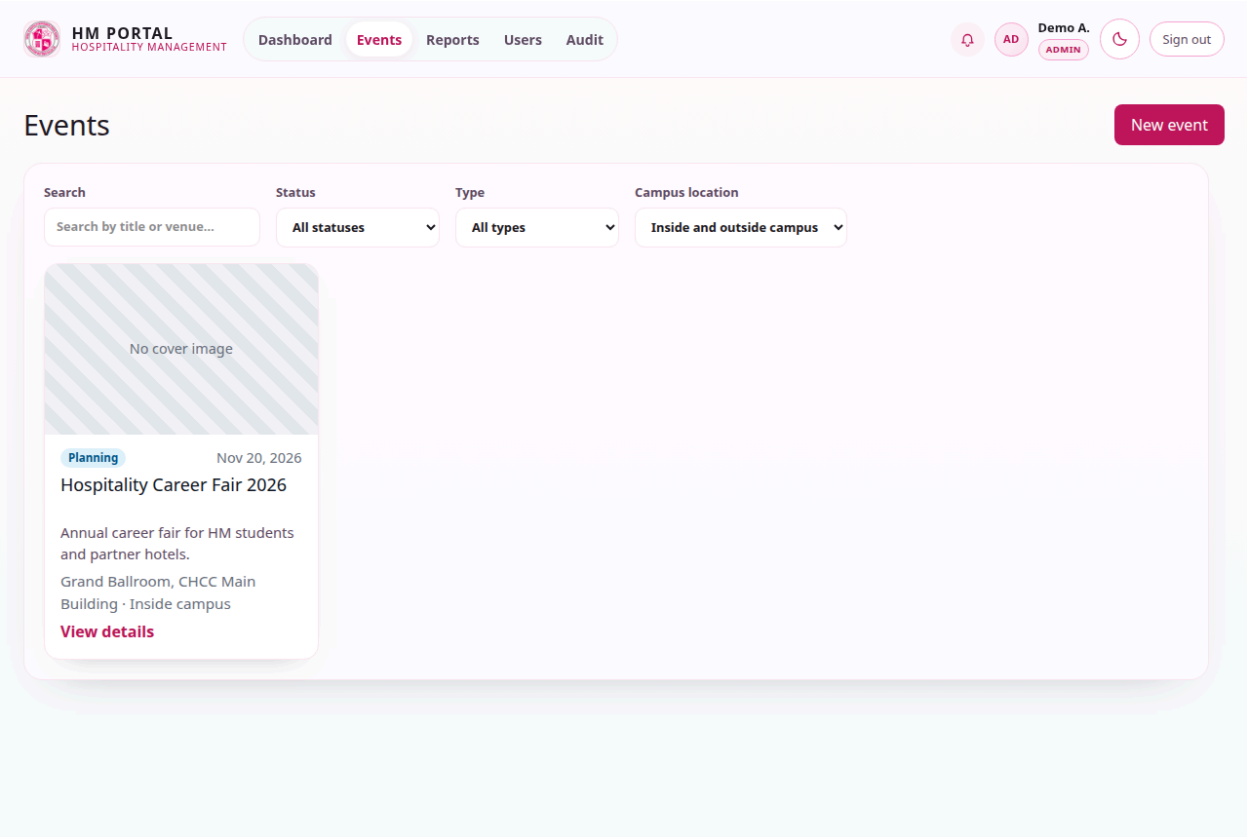

- **Live Active Events** — events currently marked *Ongoing*.
- **Scheduled Events** — events still in *Planning*.
- **Upcoming events** — the next events on the calendar, with **View all events** and **Open reports** shortcuts.

The top bar has the notification bell, your initials, a light/dark mode toggle, and **Sign out**. The navigation tabs are **Dashboard**, **Events**, and — for Admin and Department Head accounts — **Reports**, **Users** and **Audit**.

CONFIDENTIAL

3. Events

3.1 THE EVENTS LIST

The events list is the working screen for staff. It offers:

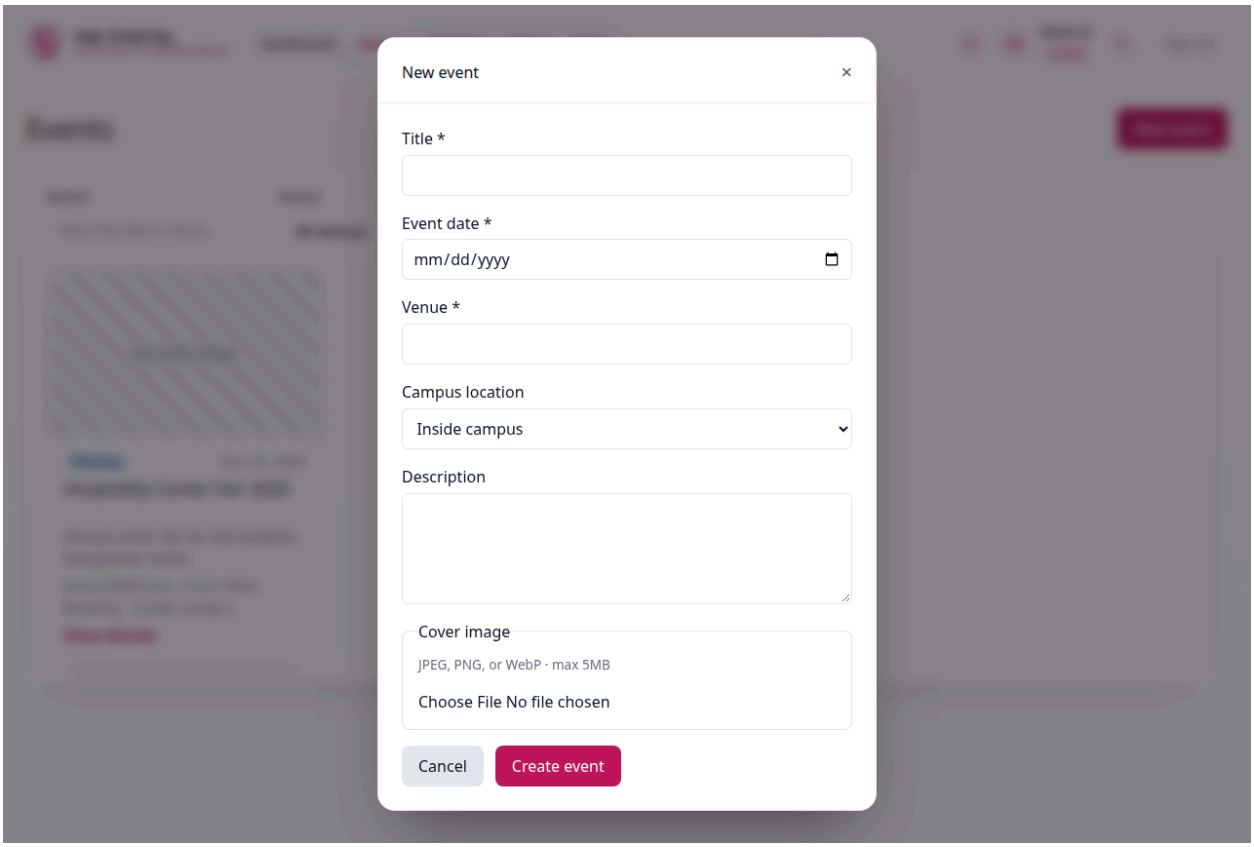

- **Search** by title or venue.
- **Status** — All statuses, Planning, Ongoing, Completed, Cancelled.
- **Type** — All types, or a single event type.
- **Campus location** — All, Inside campus, Outside campus.

New event appears only for accounts that may create events: Event Coordinator, Instructor, Student Officer, Department Head and Admin. Student accounts never see it.

3.2 CREATING AN EVENT

Click **New event** and fill in the form.

CONFIDENTIAL

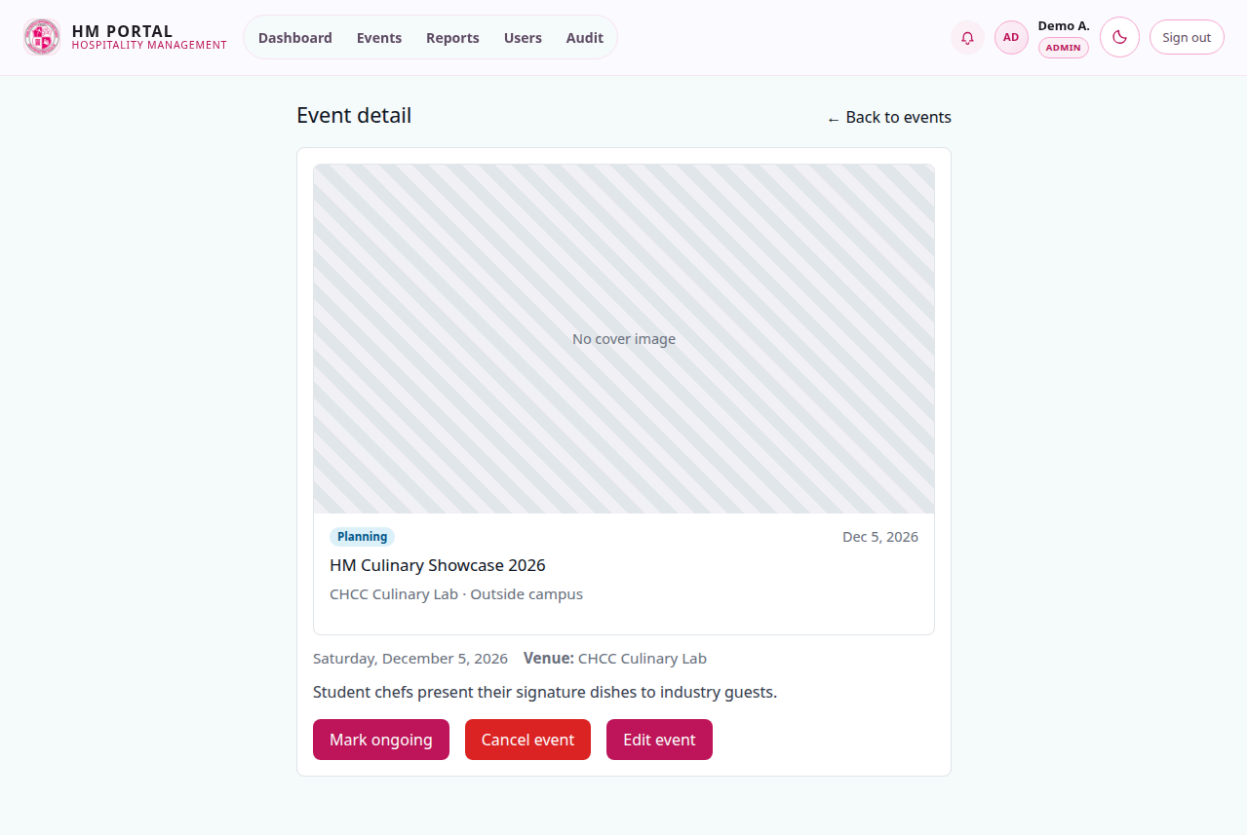

Field	Notes
Title	Required.
Event date	Required.
Venue	Required — a room, building or off-campus place.
Campus location	*Inside campus* or *Outside campus*.
Description	Optional.
Cover image	Optional — JPEG, PNG or WebP, max 5 MB.

Click **Create event**. The event is published immediately with the status **Planning** — there is no approval step and nothing waits for review. You are taken to the event page.

> Events have no department field. The system covers Hospitality Management only.

CONFIDENTIAL

3.3 THE EVENT PAGE

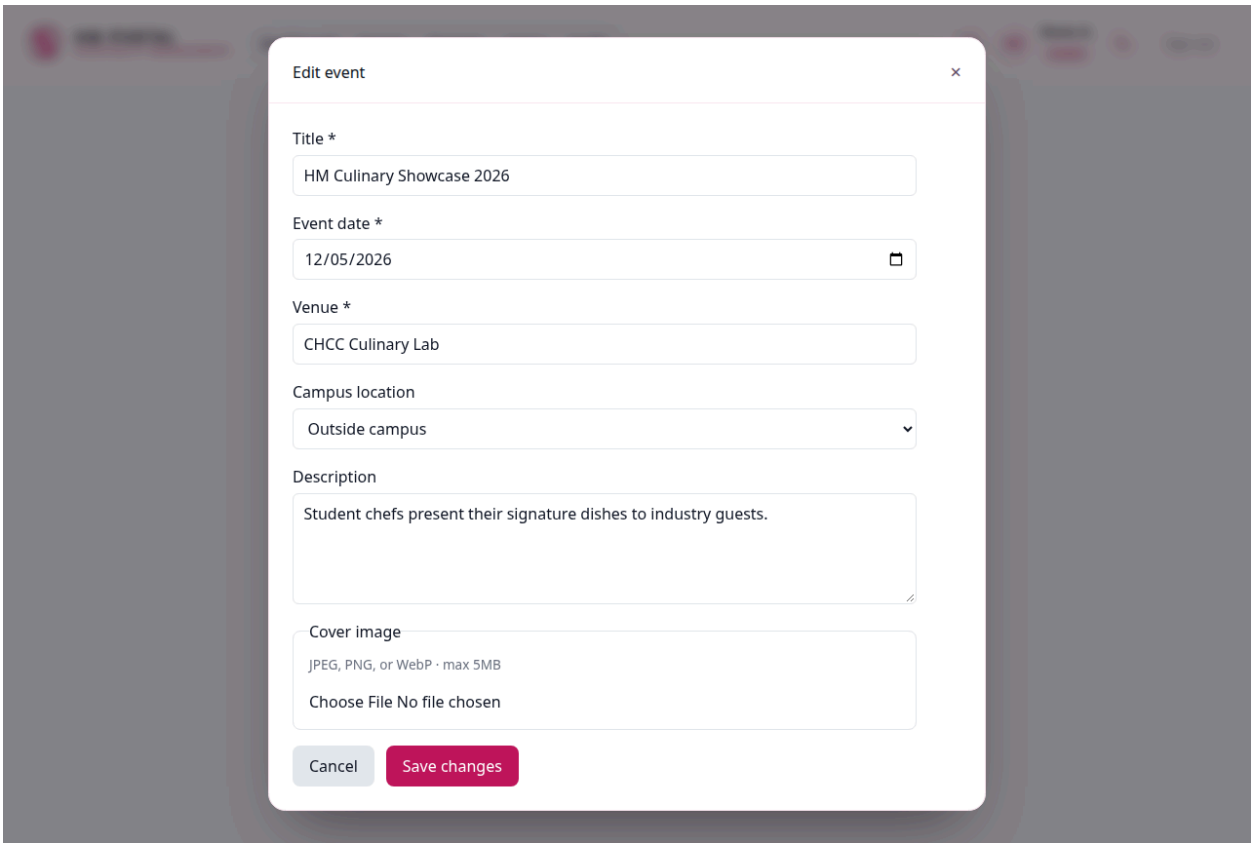

The event page is read-only. It shows the cover image, status, date, venue, campus location and description, together with the buttons your account is allowed to use.

3.4 EDITING AN EVENT

Click **Edit event** to open the edit window, change what you need, then **Save changes**.

CONFIDENTIAL

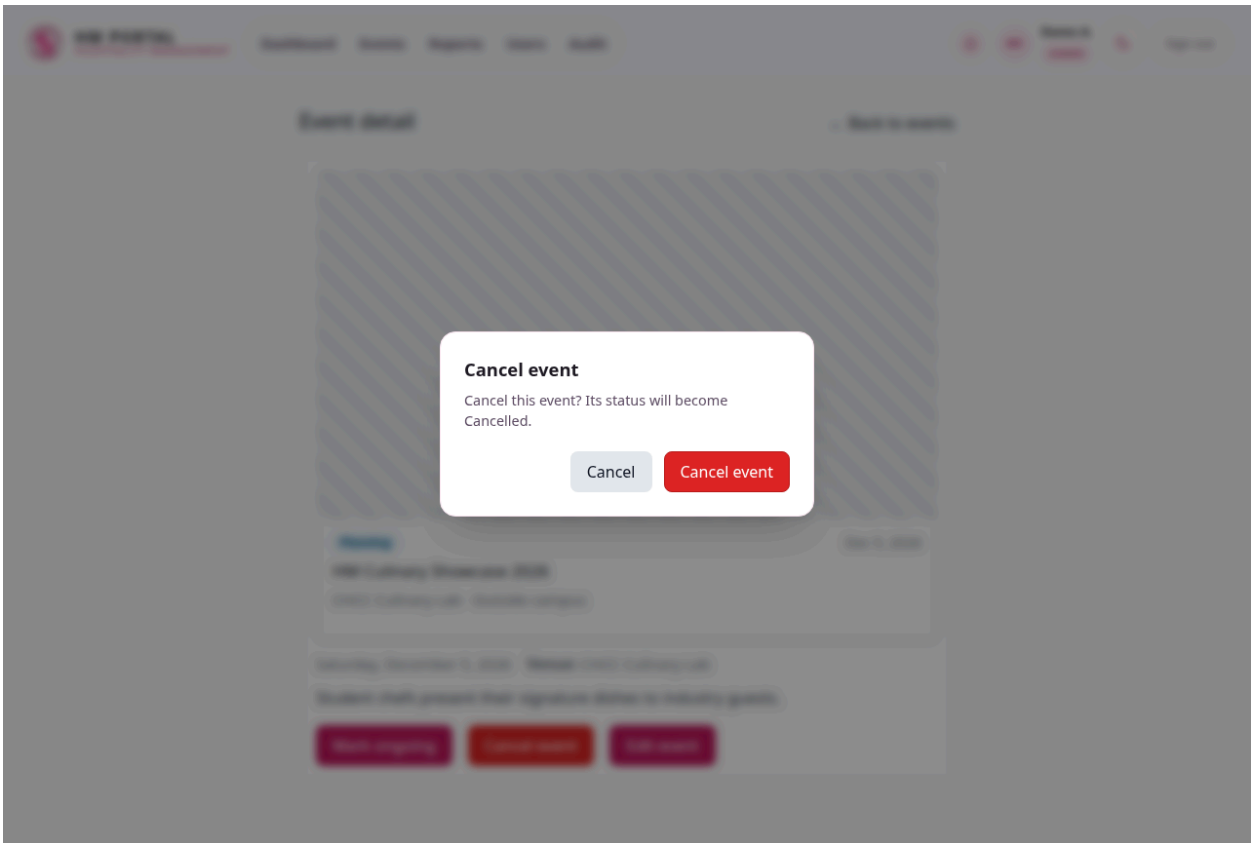

Editing is limited to the event owner, Department Head and Admin. Event Coordinators can edit their own events and nothing else.

3.5 MOVING AN EVENT THROUGH ITS LIFECYCLE

An event moves between four statuses: **Planning** → **Ongoing** → **Completed**, plus **Cancelled** at any point. Every change asks for confirmation and names the status it will apply.

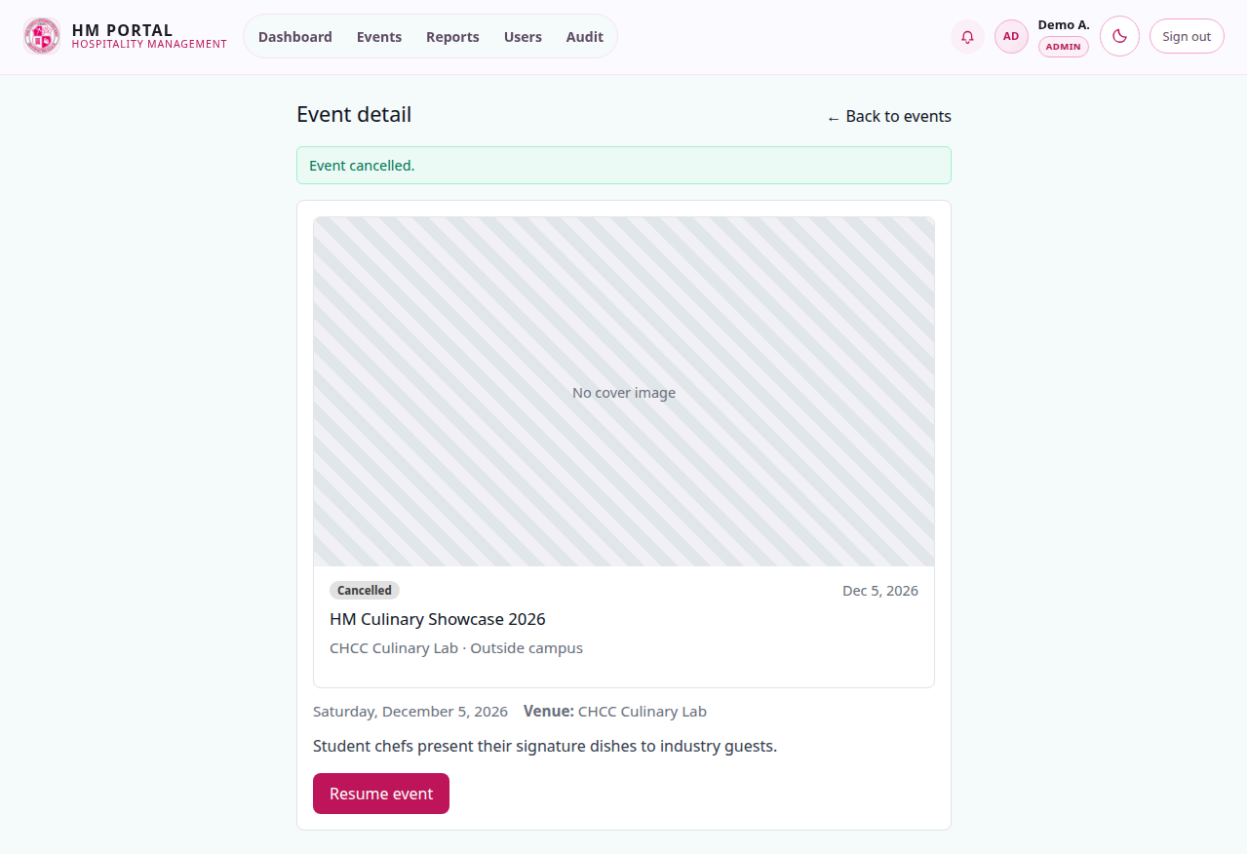

CONFIDENTIAL

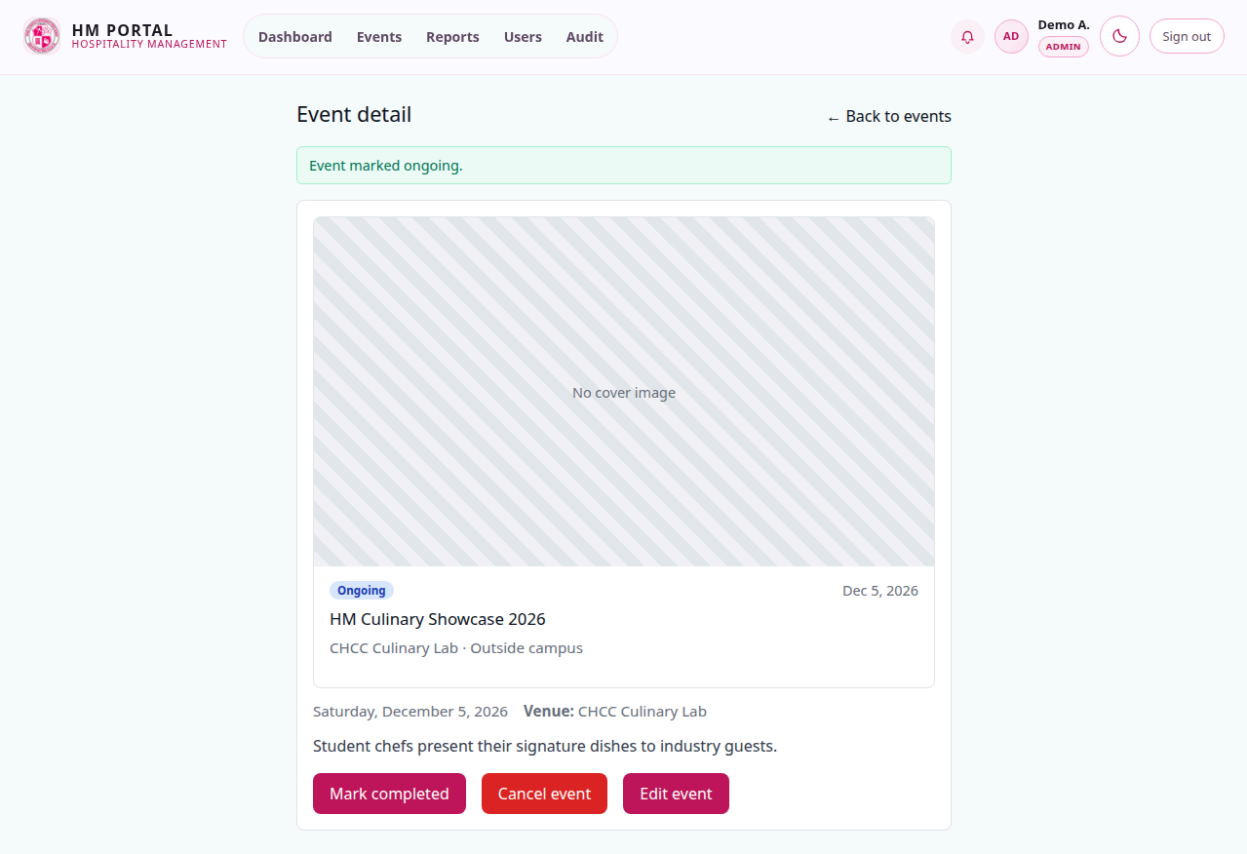

Button	Effect	Who may use it
Mark ongoing	Planning → Ongoing	Owner, Department Head, Admin
Mark completed	Ongoing → Completed	Owner, Department Head, Admin
Cancel event	Any status → Cancelled	Owner, Department Head, Admin
Resume event	Cancelled → Planning	Owner, Department Head, Admin

A cancelled event stops appearing on the public events pages; **Resume event** puts it back.

CONFIDENTIAL

CONFIDENTIAL

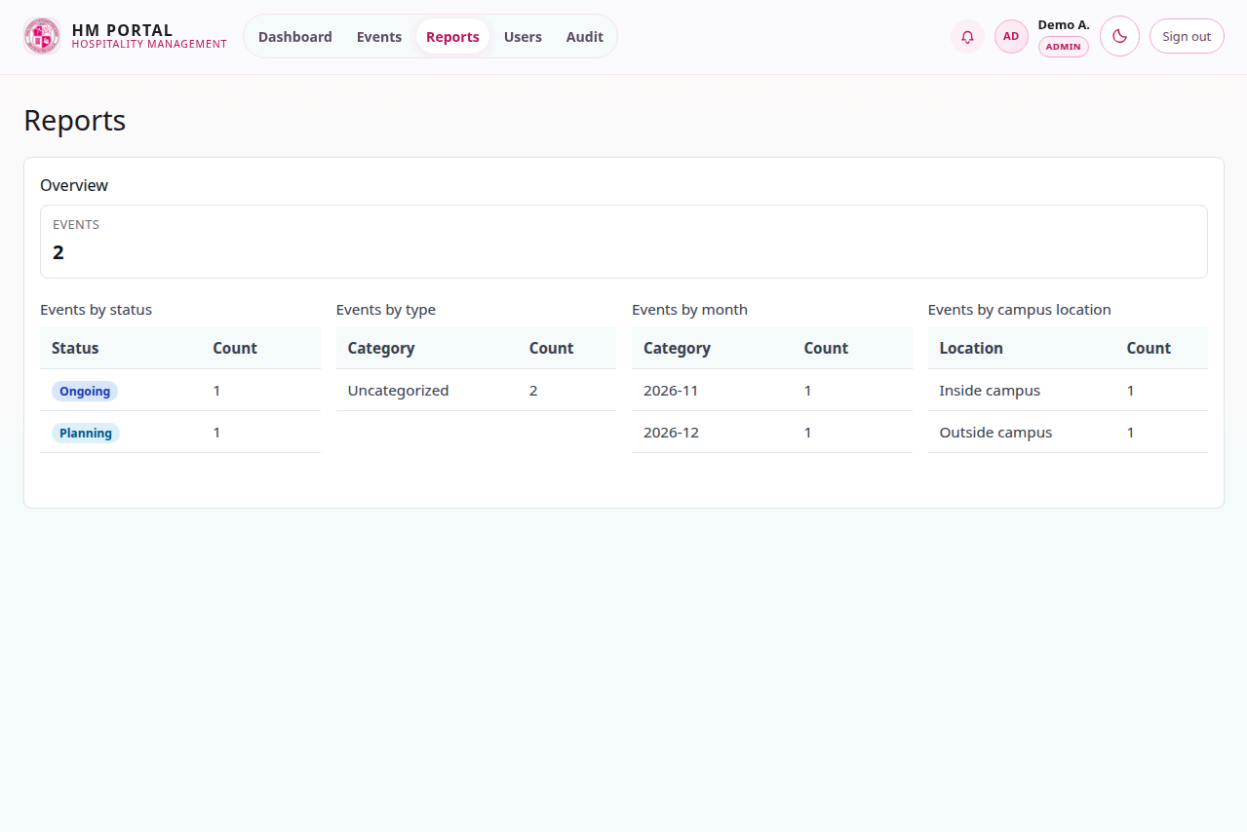

> Students can never change an event's status, no matter who created it.

---

4. Reports

Reports are available to **Admin** and **Department Head** accounts.

CONFIDENTIAL

The page shows one overview figure and four tables:

- **Events by status** — how many events are Planning, Ongoing, Completed, Cancelled.
- **Events by type** — including *Uncategorised* for events with no type.
- **Events by month** — one row per `YYYY-MM`.
- **Events by campus location** — *Inside campus* and *Outside campus*.

Categories with a count of zero are still listed, so a missing number always means zero and never “not tracked”. Reports are for reading only — there are no exports.

---

5. Audit log (Admin only)

The **Audit** tab shows every request the portal has recorded — logins, event changes, user creation and so on.

CONFIDENTIAL

CONFIDENTIAL

Filters across the top:

Filter	Notes
User	One person, or *All users*.
Entity	The record type touched, e.g. `events`, `auth`.
Action	What was done, e.g. `login`, `change-password`.
From / To	A date range.

Click **Apply** to run the filters and **Reset** to clear them.

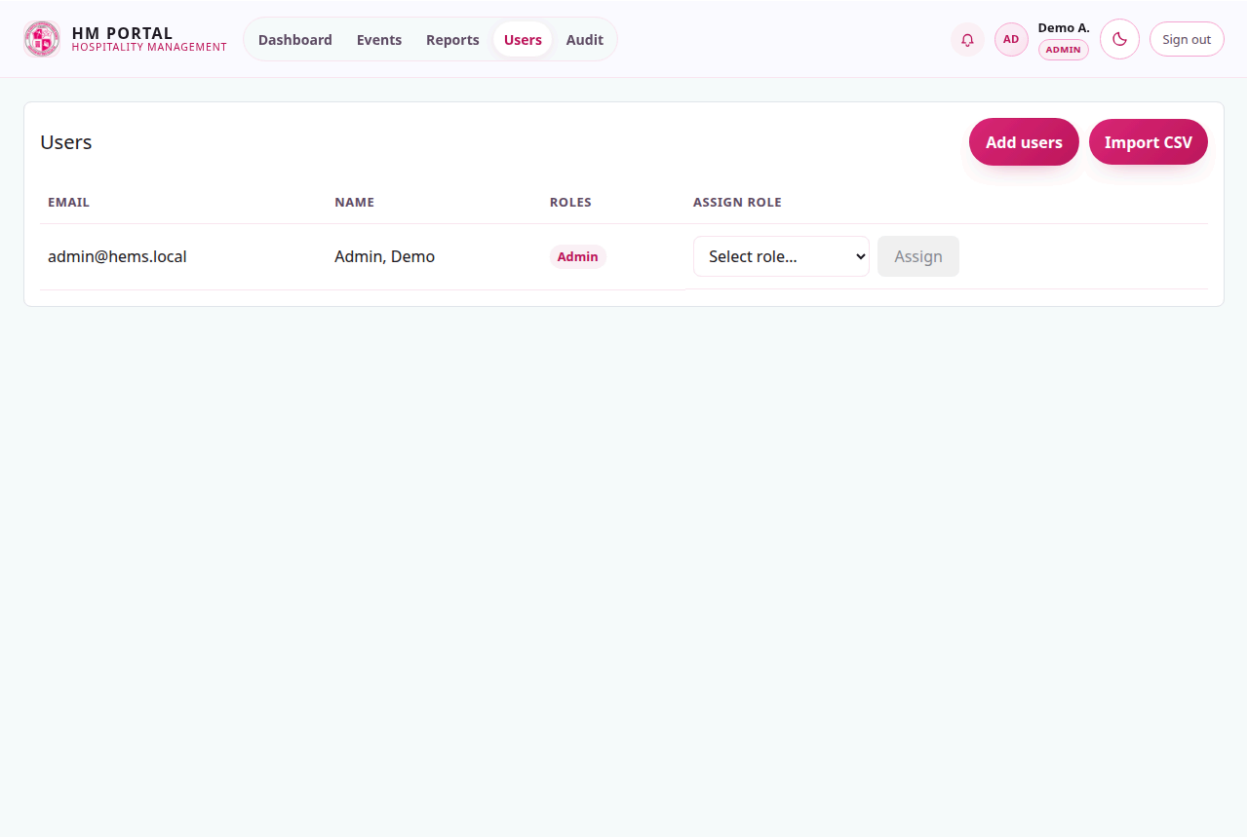

Columns: Timestamp, User, Entity, Action, Method, Path, Summary (the detail that was recorded, such as the email used at login) and Status (the HTTP result — `200` success, `401` rejected login, and so on). **System** means the entry was not tied to a signed-in person.

The entry count sits above the table, and **Previous** / **Next** move through the pages.

CONFIDENTIAL

6. Managing users (Admin only)

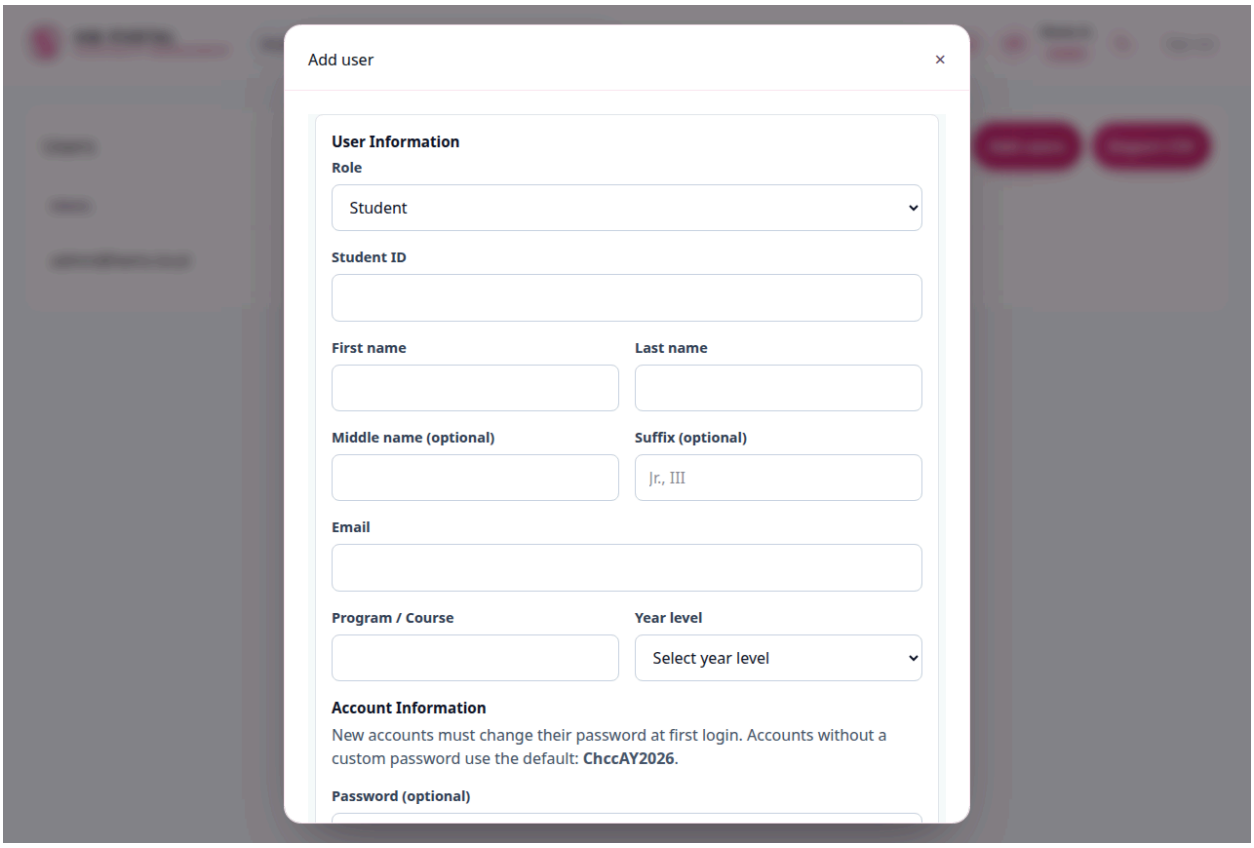

5.1 THE USERS LIST

5.2 ADDING ONE OR MORE USERS

Click **Add users**.

CONFIDENTIAL

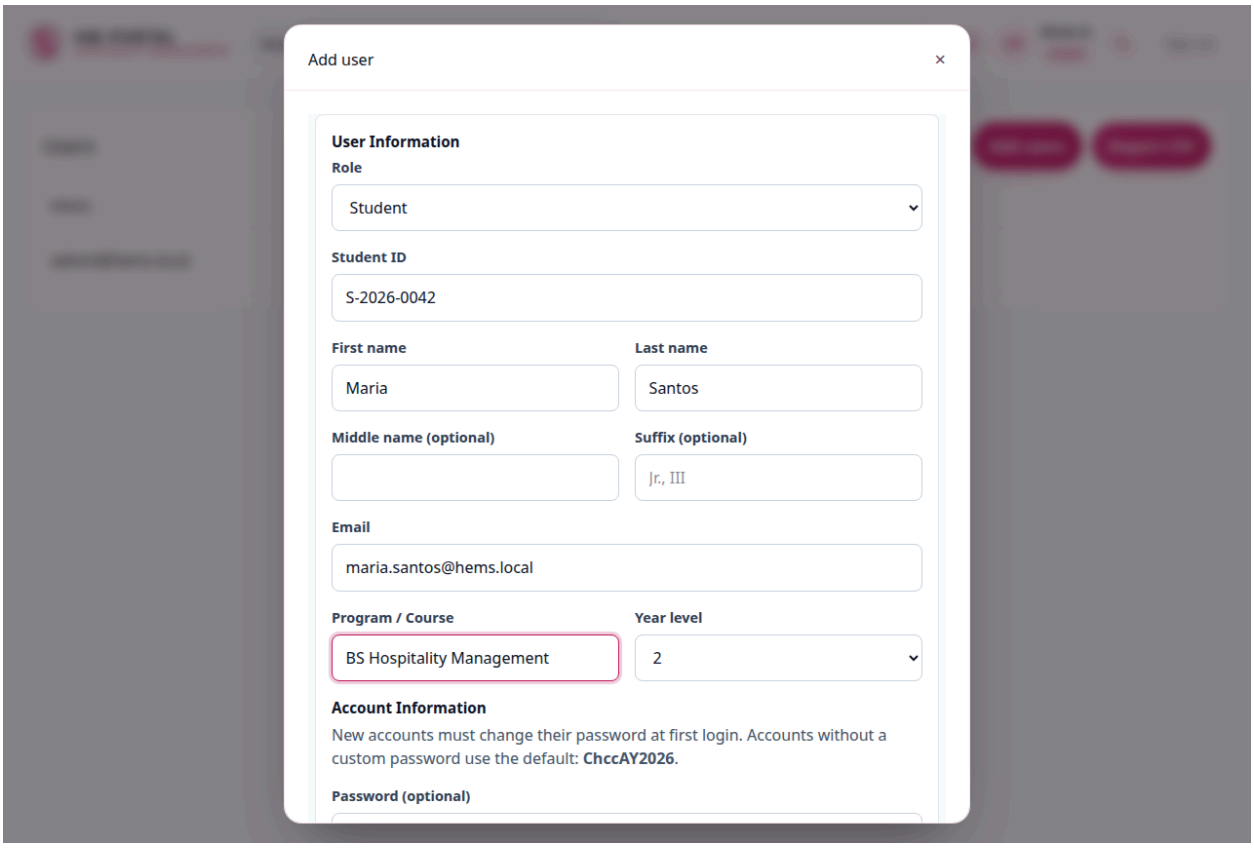

Pick the account's **role** first. Student-only fields appear only when the role is *Student*.

CONFIDENTIAL

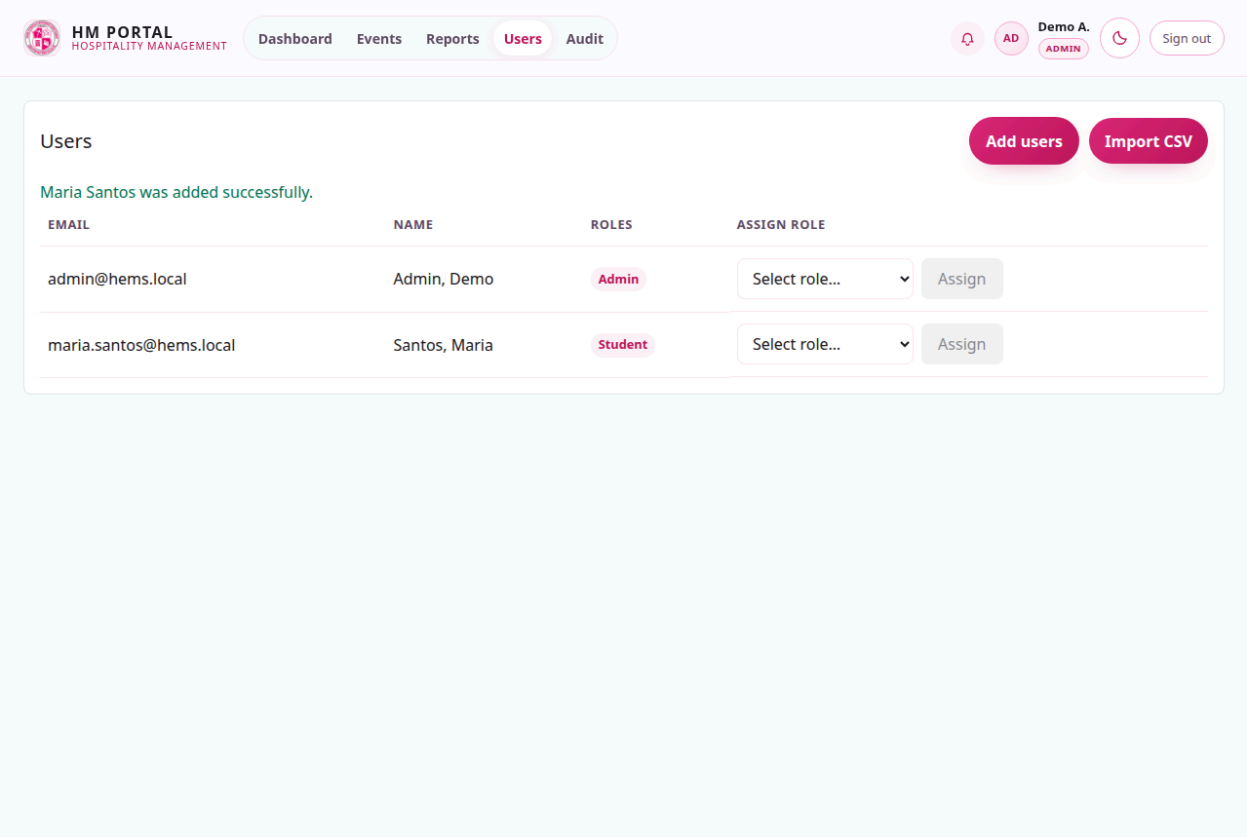

Field	Shown for	Notes
Role	All	Department Head, Event Coordinator, Instructor, Student Officer, Student.
Student ID	Student only	Required for students.
First name	All	Required.
Last name	All	Required.
Middle name, Suffix	All	Optional.
Email	All	Required, must be unique.
Program / Course	Student only	Required for students.
Year level	Student only	1–4.

CONFIDENTIAL

Every account created here must change its password at first login — for every role, not just students.

CONFIDENTIAL

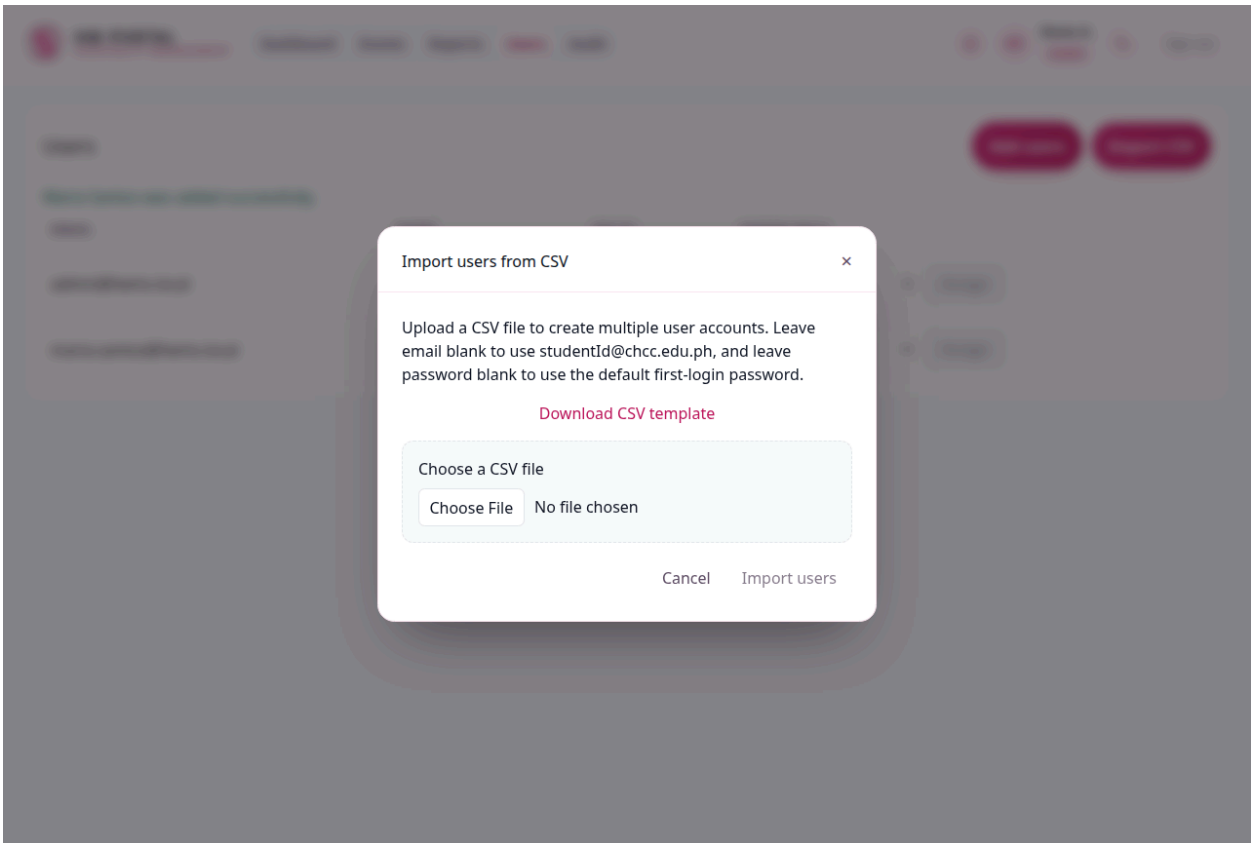

> The **Admin** role cannot be granted through the portal. It is assigned directly in the database, by design.

5.3 IMPORTING ACCOUNTS FROM A CSV FILE

Click **Import CSV** to import many accounts at once.

CONFIDENTIAL

The file needs a header row. Column names are case-insensitive:

```
role,studentId,firstName,middleName,lastName,suffix,email,program,yearLevel,
```

CONFIDENTIAL

Column	Required	Notes
`role`	No	Defaults to `Student`. Values: Department Head, Event Coordinator, Instructor, Student Officer, Student.
`studentId`	Students only	Required for rows whose role is Student.
`firstName`, `lastName`	Yes	
`middleName`, `suffix`	No	
`email`	Yes	Must be unique.
`program`, `yearLevel`	Students only	Read but ignored for staff rows.
`password`	No	Blank uses the default temporary password; the account must still change it at first login.
`isActive`	No	Blank means active.

Each row is reported individually — if one row fails, for example because the email is already taken, the reason is shown for that row and the rest continue.

---

7. Your first login as staff: changing your password

If your account was given a temporary password, the portal sends you to **Change your password** the first time you sign in. Set a new password and confirm it — you cannot continue until this is done.

This applies to every role: staff, student officers, instructors and students alike.

---

8. Things worth knowing

- **No approval queue.** Events go live the moment they are created.

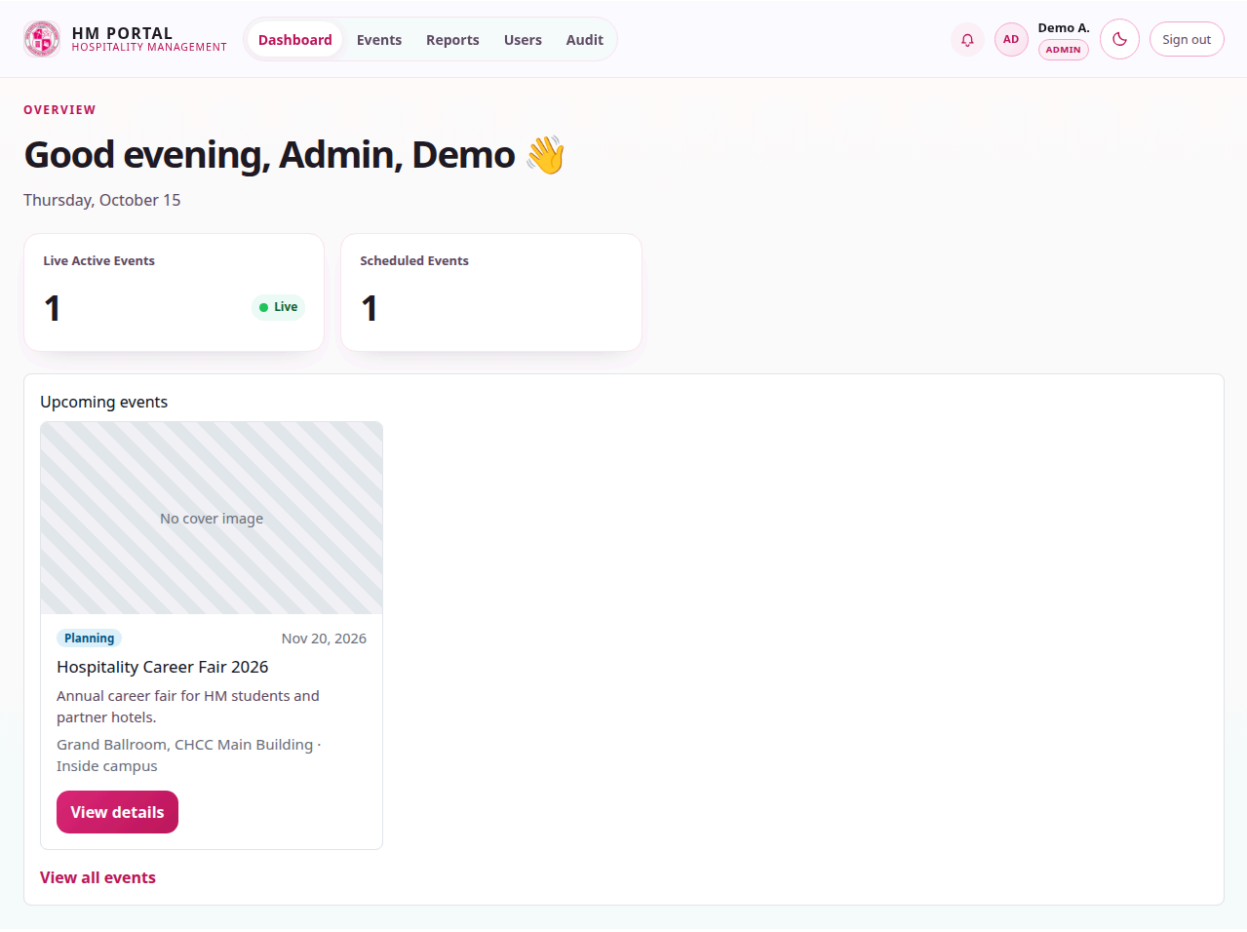

CONFIDENTIAL

- **No attendance, no participants.** This portal manages events only.
- **Cancelled events are hidden from the public pages** until they are resumed.
- **Reports are Admin and Department Head only.**
- **The notification bell** lists notifications for your account.
- **Dark mode** uses the toggle in the top bar and is remembered on your device.
- **Lost password:** ask an Admin to reset the account; there is no self-service reset.

---

9. Dark mode

The moon icon in the top bar switches the whole portal to a dark theme, and your choice is remembered on that device.
